SITE
This historic vineyard sits on the south side of route 128, 11 miles from the coast at elevations of 250-500 ft. Soils comprised of mainly decomposed sandstone result in a struggle for nutrients and water, keeping the resulting fruit load of the vineyard in natural balance. The first blocks were planted in 1963; ours in 2000 to clones 115, 777, and Swan. Edmeades is quintessential Anderson Valley with densely forested rolling hills, frequent fog, and the Navarro River running through it.
